

Christopher Lam

Senior Product Engineer & Designer

whoischrislam@gmail.com · linkedin.com/in/whoischrislam · github.com/whoischrislam · whoischrislam.github.io
Honolulu, HI · Remote-first · Bay Area available as needed

SUMMARY

Product engineer and designer with 14 years shipping healthcare products from early-stage through IPO. Founding-team designer at Clover Health (IPO 2020), GoodRx (IPO 2020), and Sharecare (IPO 2021). Short tenures are not a pattern of leaving — they are a pattern of joining early and staying through the inflection point. Currently co-founding y30, a voice AI platform for older adults built on LiveKit Agents, Python, and React. I own the full arc: research, specs, design systems, and production code. Looking for senior IC roles at voice AI, healthtech, or design-led product companies.

NOTABLE EXITS

Clover Health IPO (NYSE: CLOV, 2020) · GoodRx IPO (NASDAQ: GDRX, 2020) · Sharecare IPO (NASDAQ: SHCR, 2021)
· doc.ai acquisition by Sharecare (2021)

CORE COMPETENCIES & SKILLS

Product & Design: 0 to 1 Product Strategy · UX/UI Design · Design Systems · Prototyping (Figma) · User Research · Elder-care UX · Accessibility · Information Architecture

Engineering: React · TypeScript · Python · Next.js · HTML/CSS · LiveKit Agents · Deepgram · ElevenLabs · FSM/LLM Agent Orchestration · Supabase · Firebase · Cloudflare Workers · Docker · CI/CD

PROFESSIONAL EXPERIENCE

Co-Founder & CPTO — y30

Honolulu, HI (Remote) · 2026–Present

Voice AI platform for older adults and their care teams. Built on LiveKit Agents, Python, and React.

- Built an FSM safety engine where crisis paths are deterministic code, not prompt instructions. A hard state the model cannot override. Designed for healthcare, where an LLM cannot improvise on high-risk turns.
- Architected longitudinal memory so sessions accumulate into caregiver intelligence. One call is a transcript; thirty calls is a cognitive baseline a clinician can act on.
- Designed elder-first voice UX with no app, no screen, no login, just a phone call. Every friction point removed for a 75+ user who may not own a smartphone.
- Stack: LiveKit Agents · Python · React · Supabase · Deepgram · ElevenLabs

Co-Founder & CEO — PlaySesh

Honolulu, HI · 2024–2026

Collaborative game development tools for indie developers, built inside Discord.

- Shipped 0 to 1 alone in Vanilla JS, Express, and Supabase before recruiting co-founders. 1,790 commits, 291 passing tests, zero ad spend.
- Grew to 5,000+ users, 1,302 MAU, 119 Discord servers, and 50-min avg sessions entirely through organic product-led growth.
- Pivoted from social gaming to game dev tooling based on user behavior signal. Sessions told us what people actually wanted before we wrote a spec.

Contract Software Engineer — CureWise

Remote · 2025–2026

Oncology AI platform. Shipped multi-agent features in Next.js and TypeScript on a Firebase/Fasten Health stack.

Entrepreneur in Residence — Blue Startups

Honolulu, HI · 2024

Conducted design and product audits for 10 early-stage startups in cohort 16. Advised on product strategy, MVP scope, and design-to-engineering handoffs.

Software Engineer (Design + Engineering) — Modus Create

San Francisco, CA · 2023–2024

Shipped dark mode for JIRA and Confluence Cloud (500K+ enterprise users). Owned design, engineering implementation, and internal dev documentation. Contributed to CI/CD pipeline with Docker Compose.

Founding Product Designer — StartPlaying Games

San Francisco, CA · 2022–2023 · YC S20 / a16z · Seed-stage TTRPG marketplace, ~5 person team

Redesigned payment experience with Stripe; 100% on-time payouts. Shipped game master onboarding flow reducing booking friction.

Lead Product Designer — Sharecare (doc.ai)

San Francisco, CA · 2021 · Joined Series C · IPO 2021 (NASDAQ: SHCR) · doc.ai acquired by Sharecare (2021)

Redesigned legacy clinical studies product through user testing and competitive research. Re-engaged product-market fit after a period of stagnation.

Lead Product Designer — Pathstream

San Francisco, CA · 2019–2020 · Career development and LMS platform

First design hire. Shipped accessibility improvements, engagement features, and course organization tools. Built design system foundations.

Designer (Early Employee, 2nd Designer) — GoodRx

San Francisco, CA · 2017–2018 · ~50th employee · Joined Series A · IPO 2020 (NASDAQ: GDRX)

- Redesigned coupon redemption flow via Google Analytics and A/B testing. **Conversion rate 2% to 5%.**
- Data visualizations featured on Good Morning America, ABC News, and The Motley Fool.
- Published 50 state health fact sheets contributing to S.2554 / S.2553 prescription drug price transparency legislation.

Designer (Early Employee, 2nd Designer) — Clover Health

San Francisco, CA · 2015–2016 · ~30th employee · Joined pre-seed · IPO 2020 (NYSE: CLOV)

- Redesigned NP home-visit iPad web app end to end through contextual shadowing. **~7 to 8x lift in visit-related revenue; saved ~2 hours per nurse per day.**
- Delivered first branded version of the Clover Health website with external agency and internal teams.
- Led cross-functional alignment across design, engineering, product, data science, and medical.

Product Designer — TaskRabbit

San Francisco, CA · 2014–2015 · Led the full 2014 product redesign

Owned research, IA, UX, and visual design across web and mobile with no dedicated PM. **Tasker NPS -5 to 45-55; Client NPS -5 to 40-50; +30% task completion; +100% repeat tasks month over month.**

User Experience Designer — Amazon

San Francisco, CA · 2012–2013

- Prototyped Amazon Prime gifting flow. **Contributed to 1M+ new Prime subscribers.**
- Partnered with Samsung to design Amazon Prime Music app on Samsung Shape wireless speaker.
- Refined Amazon Game Connect workflows for third-party game publishers.

EDUCATION

University of Washington, Seattle

MS, Human Centered Design & Engineering · 2012

BS, Informatics, Human-Computer Interaction · 2010
